

ROTATING DISPLAY HOLDER FOR VCR TAPES, DVDs, AND VIDEO GAMES

ABSTRACT: A rotating display holder for VCR tapes, DVD's, and video games. The holder is round and contains multiple sleeves or compartments to hold the above media items, such that the user can easily read the title of each on the spine of the item. In the preferred mode of production, the compartments are spaced apart from one another so that the user can easily place his or her fingers around the tape or DVD to conveniently pull the item from the holder. Importantly, the rotatable holder can hold a mix of VCR tapes and DVD's or games, saving a great deal of space for the user. Therefore, the holder can be placed in a cabinet with shelves for VCR's or DVD players, as well as in a wall unit or entertainment center. The rotatable holder may be produced in several sizes, such as a small and large size, and the holders can be stacked on top of one another to hold large collections of tapes, DVD's, and games. In addition, the rotatable holder may be motorized and remotely controlled. This allows the user to spin the holder to easily locate a particular item contained within. Finally, specialized cabinets may be made for the rotatable holder, providing a compact means to hold a variety of items in an attractive manner.
